Intro

I am an aspiring **Data Engineer** with a drive of providing authentic, safe and efficient data resources used for data analysis, data driven business decisions, creating models e.tc. Currently a student at Babcock University as a Software Engineering Major with a focus on the use of cloud services like AWS for storage of data, query languages like SQL for manipulation and transformation of data and programming language like Python for loading, extracting, transformation and other functions on data.

Skills

Language: Python, SQL, Java, HTML, CSS.

Technologies: Github, Dokcer, AWS.

Tools: Visual studio code, Terminal, Eclipse, Notepad, Visual studio, Figma.

Experience

- **Airtel NG, Asaba, Delta State(June 2024-Present) – End-User Support(Industrial Training)**
 - Provisioned registration kits with the necessary software and all necessary configuration needed for seamless registration of customers.
 - Providing technical support in terms of damaged devices.
 - Gaining expertise in Ms-Excel and Ms-Access through data entry ensuring error free information added to the database.
- **Shadow devs BU, Babcock University (Dec 2022-Present)-UI/UX Designer**

Shadow dev is a community for student developers that finds solutions to problems of students within the campus and implements them with the use of software engineering process. I contributed to the MaxStud solution which helps students to schedule their reading time based on the time allocated for the class, the course units, and the personal importance of the course and the difficulty of the course.

Education

- Babcock University ,Ilishan-Remo,Ogun State – Software Engineering (Undergraduate)

Community

- GDSC BU(Member)
- GDSC Data Track BU(Member)
- Shadow Dev BU(Member)
- Life Compass(Member, Sectary)
